👍 Squirt Lube: 6 Month Review....

It's been about six months since I started testing the Squirt lube, so this is my final report on this product.

I've tested this lube under all conditions, from really dry and dusty to soaking wet and muddy trails.

In all these conditions, the lube did the job it was designed to do, and did it very well indeed.

There has been some wax buildup around the drive train, but it's fairly minimal, and the old dried out wax flakes off by itself anyways, so there is absolutely NO NEED to degrease your chain ever again. Do you see how cool that is? No more degreasing of a dirty oily chain for the life of the chain! I used to *never* look forward to the task of degreasing my drive chains on my mountain and road bikes, but with Squirt, that's history now.

No more degreasing ever!

As far as lubrication goes, the Squirt makes the chain quiet and slippery, all without collecting lots of dirt and crud. The chain remains clean and bright, with only minimal wax buildup.

To tell you the truth, I really like this Squirt lube. It does such a good job of keeping the chain working well, all without any fuss. My small bottle supplied to me by Over the Edge Sports in Australia is still half full. The lube is efficient, the chain shifts beautifully up and down without any hassles or grinding sounds, everything works very smoothly.

If I had to nit-pick anything, I would say that it is in wet weather conditions that this lube shows it's only slight weakness. But even this slight weakness is offset by the application of a new lot of lube after the chain is dry and before your next ride.

This Squirt lube is Bio-degradable, it doesn't impact the environment like the usual oil-based jobs do. So, here we have a bio-friendly lube that doesn't require degreasing, works super-well in all conditions, is cheap, long-lasting, quiet, self-cleaning, and lubricates your chain and cogs to minimise wear whilst gathering virtually no dirt or crud. What's not to like?

I am very impressed with this lube, I have changed over to using it on all the bikes I own, as well as my sons bikes. I've let customers try it out after servicing their bikes, and every one of them was happy with the results.

It's not too often that you come upon a product that just excels at what it was designed to do, but this is one of those products. After six months of hard testing this lube I am happy to recommend it to anyone who rides a bicycle.

I put in a LOT of miles on bikes, so do my sons, and we really can't fault this stuff. It just works, and it does it without any drama or fuss.

Try it for yourself...i'm sure that you won't be disappointed.

In conclusion, I give this squirt lube a solid 10 out of 10 points. It's damn good stuff!

Rainman.
